Fall 2016

“Ted Baker wares are built to last-

We do not deal in disposable clothing. Our quality fabrics are sourced from highly regarded mills and Ted’s classic styles can be worn for many seasons. Many of our garments are also made of more sustainable fibres such as Organic Cotton and Tencel, we are aiming to increase the quantity of these fibres within our collections over time.”

-Ted Baker London

Classic styling, clean lines and light sheer fabrics are the trend of S/S 18. I chose both this trend because I appreciate classic styling that lasts and remains more sustainable. I love the transparency and lightness of sheers and the way that it can change a fabric as an overlay or change with shadows and light.
